

Questionnaire

1. What in your opinion are the reasons why interoperability has stalled? Please see below examples, feel free to add your own and/or elaborate.
 - a. Too many standards
 - b. Standards don't apply to things I value
 - c. Workflow not organized to collect required data
 - d. Lack of specificity in standards (not constrained), too much optionality makes exchange impossible
 - e. Not clear if market is there for a product
 - f. Lack of clear direction or priorities
