

The Office of the National Coordinator for Health Information Technology

Annual Report Workgroup Update

Aaron Miri, Co-Chair Carolyn Petersen, Co-Chair

February 20, 2019

Annual Report Workgroup Update

- Workgroup Membership and Scope
- Next Steps and Meeting Schedules
- Discussion of Draft HITAC Annual Report for FY18
 - » Annual Report Workgroup Presentation
 - » HITAC Member Discussion

Annual Report Workgroup Membership and ONC Staff

Member Name	Organization	Role	
Carolyn Petersen	Individual	Co-Chair	
Aaron Miri	The University of Texas at Austin, Dell Medical School and UT Health Austin		
Christina Caraballo	Audacious Inquiry	HITAC Committee Member	
Brett Oliver	Baptist Health	HITAC Committee Member	
Chesley Richards	Public Health Scientific Services, CDC	Federal Representative	

ONC Staff Name	Title	Role
Donald Rucker	National Coordinator for Health Information Technology	
Elise Sweeney Anthony	Executive Director, Office of Policy	
Seth Pazinski	Division Director, Strategic Planning & Coordination	
Lauren Richie	Branch Chief, Policy Coordination	Designated Federal Officer (DFO)
Michelle Murray	Senior Health Policy Analyst	Workgroup ONC Staff Lead

Annual Report Workgroup Scope

Overarching Scope:

The workgroup will inform, contribute to, and review draft and final versions of the HITAC Annual Report to be submitted to the HHS Secretary and Congress each fiscal year. As part of that report, the workgroup will help track ongoing HITAC progress.

Annual Report Workgroup Scope

Detailed Scope: Provide specific feedback on the content of the report as required by the 21st Century Cures Act including:

Analysis of
HITAC progress
related to the
priority target areas

Assessment of health IT infrastructure and advancements in the priority target areas

Analysis of existing gaps in policies and resources for the priority target areas

Ideas for potential HITAC activities to address the identified gaps

Annual Report Workgroup Update

Next Steps and Meeting Schedules

Annual Report Workgroup Next Steps

Next steps for FY18 report development:

- HITAC full committee reviews report and suggests edits
- 2. HITAC full committee approves revised report
- 3. HITAC forwards the final report to the National Coordinator for Health IT
- The National Coordinator forwards final report to HHS Secretary and Congress

Meeting Schedule for Workgroup

Month	Deliverables to Review	
June 20, 2018	Workgroup scope for FY18 Annual Report announced	
August 2, 2018	Plans for FY18 Annual Report discussed	
August 24, 2018	Landscape Analysis and Gap Analysis Outlines discussed	
September 20, 2018	Landscape Analysis and Gap Analysis discussed	
October 18, 2018	Landscape Analysis and Gap Analysis discussed Outline of HITAC Progress in FY18 discussed	
November 9, 2018	Privacy and Security Priority Target Area discussed	
December 4, 2018	Privacy and Security Priority Target Area discussed	
January 24, 2019	FY18 Annual Report Draft discussed	
February 4, 2019	FY18 Annual Report Draft discussed	
March 1, 2019	FY18 Annual Report Draft discussed	
Winter/Spring 2019	FY18 Annual Report completed as needed	
Spring 2019	Work begins on FY19 Annual Report	

Review Schedule for Full Committee

Meeting Date	Action Items/Deliverables	
June 20, 2018	Subcommittee Charge presented	
September 5, 2018	Workgroup Update	
October 17, 2018	Landscape Analysis and Gap Analysis Update	
December 13, 2018	Description of HITAC Progress in FY18 Update	
February 20, 2019	FY18 Annual Report reviewed by HITAC	
March 19-20, 2019	FY18 Annual Report reviewed/approved by HITAC	
Winter/Spring 2019 FY18 Annual Report submitted to HHS Secretary FY18 Annual Report submitted to Congress		

Annual Report Workgroup Update

Annual Workgroup
Presentation of
Draft HITAC Annual
Report for FY18

- I. Executive Summary
- II. Foreword and Overview
- III. HITAC Progress in FY18
- IV. Health IT Infrastructure Landscape Analysis
- V. Health IT Infrastructure Gap Analysis

- VII. Suggestions for Additional HITAC Initiatives
- VIII. Conclusion
- IX. Appendices

Overview: HITAC Priority Target Areas

HITAC Priority Target Areas noted in Section 4003 of the 21st Century Cures Act cover the following areas:

Interoperability

Achieving a health information technology infrastructure that allows for the electronic access, exchange, and use of health information

The facilitation of secure access by an individual and their caregiver(s) to such individual's protected health information

Privacy and Security

The promotion and protection of privacy and security of health information in health IT

Any other target area related to the above target areas that the HITAC identifies as an appropriate target area to be considered on a temporary basis with adequate notice to Congress

HITAC Progress in FY18

- Seven HITAC meetings
- Policy Framework
- Accomplishments of Subcommittees:

Subcommittee	# Meetings	Results in FY18
Trusted Exchange Framework Task Force	9	26 recommendations to ONC
U.S. Core Data for Interoperability Task Force	9	9 recommendations to ONC
Interoperability Standards Priorities Task Force	6	Initial list of priority uses
Annual Report Workgroup	3	Kickoff and interactions with HITAC

Health IT Infrastructure Landscape Analysis

Priority Target Area: Interoperability

- Interoperability remains fragmented and uneven
- » HHS has proposed regulations and a trusted exchange framework
- » Work is underway to identify priority uses of health IT and associated standards and implementation specifications

Priority Target Area: Privacy and Security

» Needed to advance and maintain trust in interoperability and protect patients

Health IT Infrastructure Landscape Analysis

Priority Target Area: Patient Access to Information

- » Can have positive impact by supporting shared decisionmaking
- » More information, education, accessibility, and use of application programming interfaces (APIs) needed

Health IT Infrastructure Gap Analysis

• The Cures Act requires an analysis identifying existing gaps and opportunities in policies and resources for achieving the ONC FY18 objectives and benchmarks and furthering interoperability throughout the health information technology infrastructure.

Recommendations for Addressing Gaps

 The Cures Act requires recommendations for HITAC activities to address the health information technology infrastructure gaps identified.

Priority Target Area: Interoperability

Key Gap

- » Need to increase level of interoperability
- Key Opportunity
 - » Address "reality gap" between the perception of what has been certified for a system and what is truly interoperable in the field

Recommended HITAC Activity

» Further measure whether systems are truly interoperable at both content and transport levels after implementation, especially among smaller practices and by patients

Key Gap

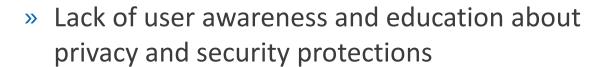

» Consider appropriate polices for the IoT

Recommended HITAC Activity

» Identify areas of IoT use that would benefit from guidance and examples of success in the health care industry

Key Gap

» Offer support for and education of technology users regarding privacy and security protections, including for health and other information shared on social media

Recommended HITAC Activity

» Identify educational approaches, technological mitigators, and potential regulatory solutions that offer improved privacy and security protections

Key Gap

- » Variability of information sharing policies across states
- Key Opportunity
 - » Increased uniformity of information sharing policies across states

Recommended HITAC Activity

» Consider federal role in setting guidelines for the exchange of data across states

Key Gap

- » Variability in adoption of cybersecurity framework(s)
- Key Opportunity
 - » Offer support for widespread adoption of cybersecurity framework(s)

Recommended HITAC Activity

» Consider the impact of nationwide adoption of cybersecurity framework(s) and delineate cybersecurity accountability for data by role

Key Gap

- » Lack of user control to share and disclose information
- Key Opportunity
 - » Consider options for granular levels of consent to share and disclose information

Recommended HITAC Activity

» Undertake a review of emerging consent approaches and the technologies that underpin them, and make recommendations for the improvement of current consent approaches

Priority Target Area: Patient Access to Information

Key Gap

Key Opportunity

» Support infrastructure needs for underserved populations, including exchange costs, the prevalence of electronic equipment, Internet access, pharmacy services, and use of telehealth services

Recommended HITAC Activity

» Measure impact of monetization of data exchange

Priority Target Area: Patient Access to Information

Key Gap

» Accessibility and usability of patient portals and other patient-facing technology continue to need improvement

Key Opportunity

» Consider improvements to accessibility and usability of patient portals and other patient-facing technology

Recommended HITAC Activity

» Measure amount/length of time a portal has been online working properly, patient engagement, and/or patient understanding and use of data

Priority Target Area: Patient Access to Information

Key Gap

Key Opportunity

» Encourage patient and caregiver education about health IT resources

Recommended HITAC Activity

» Identify use cases demonstrating the value of patient's data to the patient
