Integrating & Using Received Data

- HITAC members have expressed interest in addressing challenges of integrating and using external data

- Today's Goals

  » Defining problems and challenges

  » Identify specific examples or use cases

  » Defining categories of non-standardized, disparate data

  » Identify desired deliverables or outcomes

  » Determine initial steps

- Today's discussion will inform additional HITAC activity in 2020

The Office of the National Coordinator for
Health Information Technology

HITAC Discussion

- What are some of the most common challenges associated with receiving and integrating external data?

  » How do we define the problem?

  » What data are we trying to exchange?

  » Where are the knowledge gaps?

- Provide specific examples or use-cases

- How should we categorize problems with external data?

  » Standards, Workflow, Implementation, Certification

- What are the outcomes and deliverables of a focused HITAC activity?

  » What role does ONC play?

  » What is the best timing?

- Recommended next steps
