HITAC Target Areas in the 21st Century Cures Act

The 21st Century Cures Act identifies several target areas within which the HITAC should focus its activities. These six target areas are used to organize the report.

Use of Artificial Intelligence that Improves Health and Health Care: [NEW for FY24]

Utilizing this emerging health IT by providers, patients, and other interested parties safely, securely, and equitably to achieve better health outcomes

Design and Use of Technologies that Advance Health Equity:

Applying health IT to help all people attain their full health potential regardless of social drivers of health

Use of Technologies that Support Public Health:

The facilitation of bidirectional information sharing between the clinical and public health communities

Interoperability:

Achieving a health IT infrastructure that allows for the electronic access, exchange, and use of health information

Privacy and Security:

The promotion and protection of privacy and security of health information in health IT

Patient Access to Information:

The facilitation of secure access by an individual and their caregiver(s) to such individual's protected health information
