

Homework, Subcommittees or Both?

- Cost-value (what, how to measure, need for precision or not)
- Initial estimation of distribution of draft data classes across our stages
- Prioritization strategy: how do we determine which data class moves ahead in the case of a tie or gets pushed faster, gets more resources to move
- The balance between parsimony and broadest use when defining data classes
- Who, what and where do we think harmonization will occur
- How do we measure deployment at scale
- Others?
